What can you say about a lady who has served as a missionary all over the world, raised three children and buried one in Japan, and is described by her husband as a “velvet brick: soft and lovely on the outside with a tough-as-nails center”? *River Crossings* provides a microcosmic answer with a series of blogs she wrote while serving with her husband in Thailand. The book's title comes from the old proverb, “You cannot cross a river twice; it will be a different river, and you will be a different person.”
